

Instructions for #16-2014 & #16-2015

Notes:

1. Drill in desired position for safety pin (1/4" diameter). Safety pin is supplied with Adjustable Pedal Mount.
2. Drill and tap 1/4-20 to mount #16-2015 plate to Adjustable Pedal Mount.
3. Drill floor and steel backing plate for safety pin if using all of the slider positions. Mount accelerator pedal using the holes provided. Use adjustable rod to determine proper accelerator cable position.

Warning:

- Use special nuts supplied to bolt pedal assembly to the slider plate.
- Space unit above floor minimum 1/2" to let sand pass thru.
- DO NOT use pedal mount without safety pin.
- You must use DOT approved braided brake line for the flex lines.
- Reinforce all aluminum floors with steel backing plates.
- If not using as a slider, drill and install safety pin into top and bottom plate.
- Always use steel backing plates under floor board.
